Recent Advances in Labour Economics[1]

Universität Bielefeld, December 2024
Michele Battisti, University of Glasgow

This short document summarises the course description, programme, assessment and references. Please note that this is a live document, which will be updated, so please make sure that you look at the latest version of this document here.

Short Course Description

This course reviews recent contributions in labour economics on

1. Human Capital
2. Gender, Ethnicity and Discrimination
3. Inequality and Intergenerational Mobility
4. Labour Supply Shocks and Immigration

We first cover the literature on human capital, covering both older seminal papers and more recent contributions, and including a discussion around the role of uncertainty. We will then investigate recent work around gender, ethnicity and discrimination, with a focus on identification challenges and recent progress. Next, we will discuss intergenerational mobility. Particular focus will be on novel research designs exploiting large-scale administrative data, recent evidence on multigenerational mobility, and the role of firms in intergenerational processes. We then study local adjustments to economic shocks, with a focus on labour market effects of immigration allowing for migration decisions to take account of uncertainty. For all topics, we will start from a shorter background lecture based on a textbook, and then cover some academic papers that look at particular aspects.

[1] While this course relies on the work of many others including several courses available online, the courses by Prof Jan Stuhler were particularly useful to prepare this short course. I would like to thank Jan for sharing his material with me.

Programme

- **Session 1 (Human Capital)** on Monday 2 December 2024 at 10:15-11:45
- **Session 2 (Gender, Ethnicity and Discrimination)** on Monday 2 December 2024 at 14:14-15:45
- **Session 3 (Inequality and Intergenerational Mobility)** on Tuesday 3 December 2024 at 10:15-11:45
- **Session 4 (Student Presentations with Discussions)** on Wednesday 4 December 2024 at 10:15-11:45)
- **Session 5 (Labour Supply Shocks and Immigration)** on Wednesday 4 December at 13:00-14:30)

Assessment

Students are going to be able to choose <u>one out of two</u> options of assessments. This decision needs to be made:

- a presentation by students of one empirical project they are working on (can very much be work in progress, and can be loosely related to labour economics – just reach out to the lecturer if in doubt)

  OR

- a written exercise to be done at home and handed in to the lecturer

References

We will use some material from the textbook Cahuc, Carcillo and Zylberberg (2014, or previous edition). However, we use this textbook only as a starting point on some of the topics, and then focus primarily on research papers. Borjas' "Labor Economics" (the most recent edition is the 9th but earlier editions are not very different) is a useful (and generally more approachable) background reading. I expect students to read some of them prior to the lectures to ensure a lively discussion. The main readings below are marked with an asterisk.
